HOW WE SELECT PARTNERS AND PROGRAMMES

Every partner and programme is selected following a rigorous process that considers Relevance, Impact, Innovation, Sustainability and Cost-effectiveness. Then, following selection, each undergoes regular monitoring, evaluation and fine-tuning for maximum effect.

FROM CONCEPT TO IMPLEMENTATION

1. The MSC Foundation invites organisations to submit proposals or a concept note.

2. Preliminary selection by the Secretariat to consider the partner organisation envisaged, and to determine if the project concept is consistent with our funding guidelines, criteria and project resources, and is likely to meet its intended objectives.

3. Application: once a project has been selected, its applicant submits a concrete project proposal (Grant Application Package) that includes detailed information on the background to the project, its target group, and its planned activities, objectives and results framework, along with a detailed project budget.

4. The Advisory Board, which meets twice a year, assesses the application package and makes a recommendation to the Board. The Board approves applications once a year.

5. All our agreements are reviewed by the Legal Office to ensure their compliance with all legal and regulatory requirements and their adherence to ethical standards.

6. The Secretariat manages the implementation phase, monitoring & evaluation, and the progress & final project reports.

Emergency relief initiatives follow a different process.
